

Secured Online Voting System – Technical Documentation

Author: Project Team

Date: {{DATE}}

Version: 1.0

This document describes how the system works based on the current Laravel codebase. It is concise, beginner-friendly, and focuses on what happens in the database and code paths.

Database

- Main tables:
 - `users` : admins, system-admins, and voters with IDs, names, phone, password, role, status flags, timestamps, and optional `face_descriptor` (128-length vector).
 - `elections` : title date start/end time active flag soft deletes

End of documentation.
